Force and Motion  
Water Cycle

## NEW FOR GRADES 4-8:

NEW!

**Adventures in Water!**  
*Travel into the Ohio River and see how Louisville Water Company turns the Ohio River into drinking water. Use the video as part of a unit on erosion, earth materials or the Ohio River*

NEW!

**Tunneling for Water**  
*What's 175 feet under the ground? Fossils, sand, gravel and water! Examine the earth materials and fossils then see how Louisville Water Company is building a tunnel to provide a new supply of drinking water.*

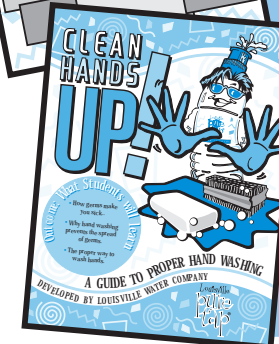

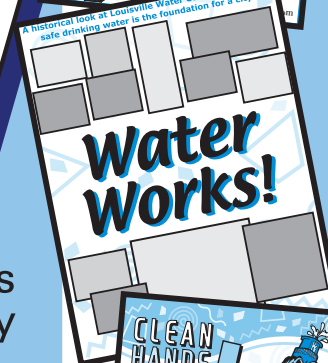

All classroom visits include guided inquiry activities, Ohio River samples for observation and assessment materials.

# One drop of water opens a world of learning!

## Field Trips

See how Louisville Water Company makes 135 million gallons of drinking water every day! The field trip combines science and social studies' activities and includes a tour of the original and current pump stations and reservoir. Field trips are available for grades two and up; maximum of 60 students per tour.

# Teacher Materials

Need help teaching force and motion? Or perhaps you need a new idea for a consumerism lesson? Louisville Water Company offers free teacher materials.

**Adventures in Water!** This curriculum includes information and activities on filtration, ground water, force and motion, global issues of water and the water cycle. *Grades 2-8 Curriculum is free after a short orientation.*

**It's Everywhere!** Explore the properties of water and community uses. *Grades K-2*

**Clear or Cloudy?** How does erosion impact your drinking water? See how with a simple experiment. *Grades 4-8*

**Water Works!** Learn the history of Louisville Water Company and how water is the foundation for a community. Includes a dvd on the history of Louisville Water Company *Grades 3-8*

**Clean Hands Up!** Water and fake germs illustrate the proper way to wash hands. *Pre-k through 2nd grade.*

**On-line Learning** Visit [www.tappersfunzone.com](http://www.tappersfunzone.com) for information, experiments and activities for teachers and students.

**Louisville Water Company uses water as the foundation for integrated learning that's filled with real-world applications!**
